ABSTRACT

Dr. Jane Lubischer challenges students to be intentional and to use a big picture way of thinking about their own academic interests as they build their education.

Jane Lubischer went to college to become an English teacher, decided she would rather be a basketball coach, discovered a major where she could study both biology and psychology, and finally ended up earning a Ph.D. in neuroscience. Now she spends much of her work life designing and building better courses, curricula, and programs for all undergraduate students at NC State.
